

# Sanitary measures for covid-19

Chauché, 05/06/2020

This document gives the measures that we put in place at our campsite to limit the spread of covid 19. They come from governmental recommendations which are regularly reviewed and eased one by one for the improvement of the sanitary situation.

## **The reception and the grocery:**

Physical distancing is in operation and is implemented, according to zones, if necessary, by a one way system and ground markings.

## **Free bike loan system:**

We clean used bikes once a day: saddle and handlebars. A disinfectant spray is also available with clean cloths if you want to disinfect by yourself.

## **The library:**

A quarantine is applied to books and board games on their return.

## **The swimming-pool:**

Access points and furniture: handles, shower taps, deck chairs, are disinfected once a day. A disinfectant spray is also available with clean cloths if you want to disinfect by yourself.

It's important to remember that the virus doesn't survive in the swimming-pool's chlorinated water. As usual at our campsite, the precise checking and automatic dosage of chlorine allows us to guarantee that the pool water disinfects by itself.

## **The kids club:**

Maximum number of children will be respected during the kids' club activities.

Outdoor activities will be preferred.

Indoors, physical distancing will be respected in our big open air hall.

**Sanitary points:**

The sanitary points are cleaned four times a day, it is our Camping Qualité label commitment.

A particular attention will be paid to contact points: handles, taps, toilet seats, with the use notably of disinfectant spray. A disinfectant spray is also available with clean cloths if you want to disinfect by yourself.

**The restaurant:**

The restaurant open at the start of July. It's easy for us to put in place the protocol currently applicable in bars and restaurants, even should it be relaxed.

Indeed, our restaurant has an area of more than 115 m<sup>2</sup> and the terrace has more than 300 m<sup>2</sup>. We already welcome a maximum of 25 customers per service, respecting the physical distancing. Waiting staff and kitchen staff will respect the recommendations of the sanitary authorities.

**Accommodations:**

Accommodations will be ventilated several hours between two rentals. At the Domaine, there are 6 hours between the guests' departure and the next ones' arrival.

Surfaces will be disinfected thanks to a spray

Also, a kit with a disinfectant spray and clean cloths will be available on request at the reception if you want to do your own disinfection.

Beds are made before your arrival with clean linen washed according to a procedure which guarantee the virus' elimination: 60 degrees Celsius during 30 minutes. If you want to make the bed yourself with our linen or bring your own linen, you can let us know a few days before your arrival at the latest.
